Work Experience

Front-End Developer Lead

July 2023 - Present
Global Spark | Mississauga, ON, Canada
- Refactored legacy code for the globakspark.world website
- Collaborated with designers to prototypes based on Figma mockups.
- Frequently collaborated with team to provide biweekly deliverables

Full-Stack Developer Intern

April 2023 - October 2023
Empire Health Systems | 1360 Valley Vista Dr., Diamond Bar, CA
- Refactored legacy code for the empirehsi.com website
- Handled database management and server-side operations
- Assisted in domain security management, ensuring compliance with **HIPAA** regulations.

Projects

Metadata Object Generator

React | JSON | metadata

A React-based web application features a dynamic form for generating metadata JSON objects. It supports input of various metadata fields, including nested objects and specialized input types. Built to streamline my SEO Metadata generation.

Personal Journaling Web Application

React | React-Router | TailwindCSS | CRUD

A personal journaling web application where users can Create, Read, Update, and Delete (CRUD) journal entries in a private and secure environment. This application was built with the intention of providing a simple yet intuitive interface for personal reflection and growth.

Developer Portfolio

Next.js | AOS

My web developer portfolio built using Next.js for enhanced page load-times and performance. Features latest app router for server components (partial hydration).
